Rotomac 330

Escalator Cleaning Maschine

The **Rotomac 330** escalator cleaner is the only escalator cleaner in the world that can automatically and simultaneously deep clean both horizontal and VERTICAL parts of the escalator step without interfering with the escalator.

Compared to conventional cleaning methods (tiresome cleaning by hand) the **Rotomac 330** is safe and ergonomically comfortable, and provides fast, reliable, and extremely thorough cleaning of all visible step surfaces.

One operator is sufficient for the safe and easy handling, transportation and operation of the **Rotomac 330**.

Quick overview of advantages:

- ✓ wet cleaning of all visible step surfaces.
- ✓ in-situ cleaning, no need to remove the steps
- ✓ simultaneous cleaning of the tread and riser (vertical step)
- ✓ adjustable step height between 18.5 and 23cm
- ✓ simple handling through automated cleaning process - quantifiable and measurable performance
- ✓ effortless to operate, choice of 3 pre-programmed cleaning cycles
- ✓ economical water/cleaning solution consumption, adjustable to the degree of soiling
- ✓ simple to change brushes
